Re: Field Schedule for Arkwood, Inc. Site
Phase II Remedial Investigation

Dear Mr. Truskowski:

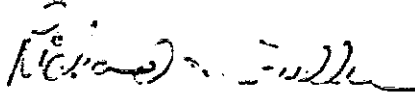

Pursuant to your recent request for a schedule for field activities related to the Arkwood, Inc. Site Phase II Remedial Investigation, we refer you to the schedule provided in the approved Phase II work plan (see Figure 2-2, attached). Based on receipt of Mr. Bondy's letter of approval dated October 10, 1989, and received at our office on October 16, 1989, the starting date of the attached schedule is October 16, 1989. We also refer you to Allan Gates' letter to Cheryl Mack dated November 7, 1989.

We believe we will be able to complete the work as scheduled with the exception of the dye study, for which we have yet to receive approval to proceed from EPA, and the sequential sampling and final flow sampling events which have been delayed due to persistent low flow conditions at the site. If weather conditions continue to be unfavorable, these sampling events will be handled in the manner described in the Final Phase II Work Plan and ERM-Southwest's September 29, 1989 transmittal letter to Garret Bondy. We are also redoing the altimeter survey which was originally inconclusive. It will be conducted concurrently with the boring program.

Should you have any further questions, please do not hesitate to call.

Sincerely,

ERM-SOUTHWEST, INC.

Richard H. Fuller, P.G.
Principal
